<sup>1</sup> Net profit per share is calculated as the ratio between net profit of the Group (equity holders) generated in the first three months of the financial year and the number of the Bank's shares on the last day of the reporting period.

<sup>2</sup> Share book value on the last day of the reporting period is calculated as the ratio between the equity of equity holders and the number of shares on the last day of the reporting period.

# Overview of operations in the period January – March 2009

The real sector suffers increasingly from the world financial crisis. **The global economic environment and the economic performance of Slovenia's most important export markets deteriorated further in the first quarter of 2009.** Based on the forecast of the International Monetary Fund, the Slovene GDP is to drop by 2.7 per cent in 2009, and the Institute of Macroeconomic Analysis and Development of the Republic of Slovenia predicts a drop of 4.0 per cent.

The crisis requires an above-average level of impairment and provision expenses. The Nova KBM Group maintains its conservative policy with regard to impairments and provisions, thus providing for increased security of operations. Total impairment and provision expenses amounted to €13 million.

**Despite the crisis, the Nova KBM Group delivered a profit of €3.3 million in the first three months of 2009.**

Profit before provision and impairment expenses was €1.8 million above the figure of the same period of 2008. This increase is mainly the result of high net interest income. The interest margin of the Nova KBM Group was 2.36 per cent and of Nova KBM d.d. 2.27 per cent, 0.54 percentage points above the average of the banking system.

Operating costs in the first quarter of 2009 were within the adopted plan. The Group improved the operating costs to average total assets ratio to 1.91 per cent, while Nova KBM's ratio stood at 1.68 per cent.

Current economic conditions and forecasts for the future development clearly prevent both individual and corporate customers from incurring debts. Loans to customers went up by 3 per cent in the first quarter of 2009, compared to 20 per cent for the whole of 2008.

Total assets rose by 2 per cent in the first quarter of 2009, mainly due to the increase in newly approved loans and the purchase of debt securities issued by the state and central banks.

Capital adequacy of Nova KBM as of 31 March 2009 was 11.06 per cent (total equity) and 7.59 per cent (original own funds), respectively.

The 2009 results will depend to a large extent on macroeconomic conditions. The Group expects an increase in impairment and provision expenses along with stable interest and non-interest income.

The Nova KBM Group was presented at the Day of the Slovene Capital Market which took place in Ljubljana on 7 April.

In February 2009, Nova KBM d.d. opened a representative office in Belgrade. This is considered to be an important step on the way to meeting the Group's strategic objective of becoming a recognisable financial group in south-eastern Europe as regards integrity and contemporaneity of its service.

# Events after the end of the reporting period

At the beginning of April, Nova KBM received a deposit of €325 million from the state, which is of particular importance for the Bank. As a result of the financial crisis, the financial institutions currently have difficulties in accessing fresh funding in global markets.

The Management Board decided to propose to the Shareholders' Meeting to adopt a resolution on acquiring own shares, with a limitation that the portion of own shares will not exceed 10 per cent of the share capital, and the authorisation for such acquisitions to remain in force for a maximum of 36 months. The acquiring of own shares would be based on the eighth indent of the first paragraph of Article 247 of the Companies Act.

The Nova KBM Group was presented at the Day of the Slovene Capital Market which took place in Ljubljana on 7 April. At the same time, senior officers of the Bank held a number of one-to-one meetings with several investors and analysts.

On 15 April, the representatives of Nova KBM participated at the investor conference in Zürich organised by the Raiffeisen Group. This is one of the most distinguished investor conferences for the SE Europe, and the representatives of the Bank held several meetings with different investors and analysts.

On 12 May, the Nova KBM Group participated in the investor conference in Belgrade sponsored by the East Capital Fund. On this occasion, the representatives of the Group held several meetings with investors and analysts.

On 21 May, the Nova KBM Group participated in the investor conference in Belgrade organised by the Ljubljana Stock Exchange, the Belgrade Stock Exchange and the Raiffeisen Group. A number of meetings with investors and analysts were conducted during the conference.

At its 9<sup>th</sup> regular meeting, the Supervisory Board approved the proposal of the Bank's Management Board to pay a dividend of €0.20 per share.

# Letter to the shareholders

Dear Shareholders and Business Partners,

The financial crisis which spread across the globe in 2008 had a negative impact on the performance of financial institutions. Uncertain financial market conditions continued in the first quarter of 2009, and the crisis also hit the real sector. Despite a rapid response of the Nova KBM Group to the developments in the financial markets and the real sector, we could not fully avoid the negative impacts from the environment. The growth in loans and deposits is declining, and the number of bad loans and customers not meeting their payment obligations are growing. These global changes require from us that we place an even greater emphasis on the quality of assets.

In spite of uncertain financial market conditions, the Nova KBM Group largely set off the negative effects and performed well in the first three months of 2009, delivering a profit of €1.7 million or €0.04 per share. Furthermore, the total assets increased by 2.1 per cent to €5.6 billion. Nova KBM d.d. generated a profit of €3.6 million or €0.14 per share.

In the coming period, there will be a number of challenges and opportunities in our operations. The forecasts with regard to future performance of the global economy are uncertain, and they predict a difficult year 2009. A significant drop in the economic activity which can be noticed in most developed economies as well as in developing countries, had a negative effect on the industrial production, employment and the real estate market. The rate of growth in loans to the corporate sector will most probably continue to decline as a consequence of the above stated factors. Therefore, all economic players will feel the negative effects of the global economic crisis. Notwithstanding the difficult situation, we have to remain positive in our attitude, and the recent developments in the global stock and other financial markets send us a signal that the bear trend might be at the turning point. Our plans for 2009 are not less demanding than in the past. We will make considerable efforts to provide sufficient funding, build up efficient management models, supervise the quality of operations and ensure integral business excellence and further streamlining of operating processes. By adopting these measures, we are convinced that the Bank will successfully withstand the pressures of the global financial crisis and will come out of the crisis stronger than at the moment. The evidence of our efforts was already demonstrated in the first quarter of 2009 in which the Bank delivered a profit.

Among objectives for 2009 we wish to point out the governance of the Group and retail operations which we will develop further. The constantly changing market conditions require greater adaptability, openness to new ideas and a fresh impetus to cooperation. Prudent cost management is, of course, of great importance in these precarious times. We see our advantage - in addition to the results delivered so far and good knowledge of the markets in the region - in the readiness to search for new solutions and responses to challenges and difficulties that might still be ahead of us.

Please allow us to thank all of you who have - either with your work or your positive attitude toward our activities - contributed to the fact that the Nova KBM Group has remained a respected business partner despite the extraordinarily difficult conditions for the local and for the global economy.

Maribor, May 2009

**Matjaž Kovačič**

President of the Management Board

# KBMR share and ownership structure of Nova KBM

The ownership structure of the Bank as of 31 March 2009 is the following: The Republic of Slovenia holds 41.50 per cent of the capital, Kapitalska družba d.d. and Odškodninska družba d.d. hold 4.80 per cent each, households hold 22.90 per cent of the capital, other financial institutions 13.70 per cent, foreign persons 5.90 per cent, non-financial companies 5.80 per cent, and banks 0.60 per cent.

Retail investors that were in possession of KBMR shares from December 2007 to September 2008 received bonus shares from the government. Therefore, in September 2008, the holding of the Republic of Slovenia was reduced by 0.80 percentage points to 41.50 per cent.

### Information on shares

The share capital of the Bank is split into 26,081,979 ordinary no-par value shares. Nova KBM d.d. has issued only one class of shares which are all freely transferable and bear the same rights. Each ordinary share entitles its holder to one vote at the Shareholders' Meeting.

Holders of ordinary shares have the following rights:

- participation in the management of the Bank,
- participation in profits (dividend), and
- pro-rata distribution of residual assets in case of bankruptcy or liquidation of Nova KBM d.d.

The Bank is bound to pay to the shareholders a dividend, and will allow the shareholders to participate and vote at the Shareholders' Meetings.

<sup>13</sup> Block trades are also taken into account.

# Financial result of the Nova KBM Group for the period

Profit from continuing operations of the Nova KBM Group in the period from 1 January to 31 March 2009 was €3,282 thousand. Net interest income of €32,001 thousand contributed most to the profit of the Group. Despite the decrease in the key interest rate, which went down by 0.75 percentage points in the first three months of 2009, and consequently the decrease in the EURIBOR, the net interest income of the Group remained high. Net interest income went up by 5 per cent compared to the same period of 2008.

Total interest income in the first quarter of 2009 reached €68,867 thousand. Nova KBM contributed most to the interest income of the Group. Its share in the total interest income of the Group accounted for 77.7 per cent, followed by Poštna banka Slovenije d.d. with a 12.4 per cent share, and Adria Bank AG with a 4.6 per cent share.

Net fee and commission income of the Group amounted to €13,170 thousand.

Gross income, being the aggregate of net interest income, net fee and commission income and net other non-interest income, amounted to €42,189 thousand in the first three months of 2009. Net interest income of €32,001 thousand accounted for 76 per cent of gross income, and net fee and commission income of €13,170 thousand accounted for 31 per cent.

The Group realised a loss of €1,266 thousand from financial assets and liabilities held for trading, and a loss of €2,226 thousand from equity investments in associated companies. The latter is due to a loss of Zavarovalnica Maribor d.d. in which the Bank has a 49.96 per cent shareholding.

The interest margin, calculated on the average total assets, was 2.36 per cent at the end of March 2009, 0.06 percentage points below the figure of the same period of 2008.

## Structure of income and expenses

Operating costs amounted to €25,933 thousand in the first quarter of 2009, €1,489 thousand over the amount from the same period of 2008. The operating costs in average total assets ratio of the Group was 1.91 per cent, a decline of 0.03 percentage points from the same period of last year.

Net impairment and provision expenses reduce the profit of the Group in particular. In the period from January to March 2009, net impairment and provision expenses amounted to €12,973 thousand, an increase of €24,474 thousand over the same period of last year when the Group recorded net income from this item.

Main reasons for such an increase in impairment and provision expenses are deteriorated economic conditions and the GDP forecast for 2009 which is to drop by 4.0 per cent until the end of the year.

# Financial position of the Nova KBM Group

Total assets of the Nova KBM Group amounted to €5,604.114 thousand as of 31 March 2009, an increase of €114,167 thousand or 2.1 per cent over the 2008 year-end. In terms of total assets, Nova KBM d.d. and PBS d.d. have an 11.1 per cent market share in the Slovene banking system.

The largest increase in the period under review was recorded in loans to non-bank customers, namely by €112,046 thousand or 3 per cent. Of this amount, €100,210 thousand pertains to loans to non-financial companies approved by the parent Bank.

Loans to non-bank customers amounted to €3,387,398 thousand at the end of March 2009. Of this amount, the largest portion pertains to the parent Bank and PBS d.d. which together hold an 11.3 per cent market share in the banking system in this segment.

Available-for-sale financial assets also posted an increase in the first quarter of 2009, i.e. by €91,810 thousand or 10 per cent. The largest increase pertains to the parent bank, and relates mainly to debt securities issued by the state, the central and other banks.

Financial assets held for trading, which amounted to €52,238 thousand at the end of 2008, went down by €21,351 thousand until the end of March 2009, mainly due to the maturity of several bank bonds that the parent Bank held in its portfolio.

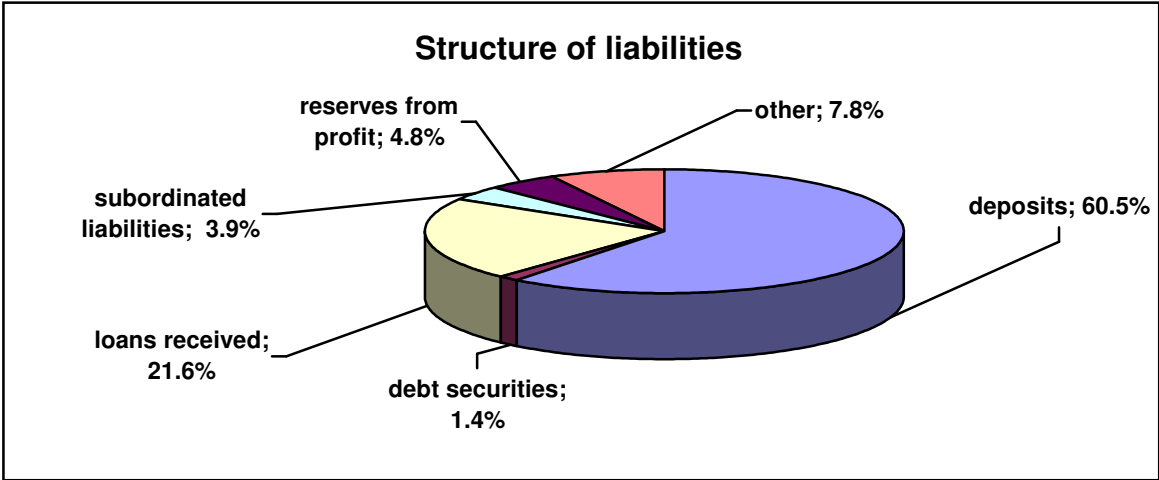

Loans to banks and non-bank customers accounted for 72.8 per cent of the total assets at the end of March 2009, an increase of 0.1 percentage points from the 2008 year-end. Available-for-sale financial assets accounted for 18.4 per cent, up 1.3 percentage points from the 2008 year-end. Financial assets held for trading accounted for 0.6 per cent and held-to-maturity financial assets for 1.7 per cent of the total assets.

Within the structure of liabilities, the largest increase, i.e. by €96,993 thousand, was recorded in financial liabilities measured at amortised cost. Deposits from banks and non-bank customers increased by €149,243 thousand, while loans from banks and non-bank customers dropped by €27,134 thousand.

Of the increase in total deposits, the deposits from non-bank customers recorded the largest increase, namely by €132,471 thousand or 88.8 per cent of the total increase in deposits, and the remaining amount pertains to the increase in deposits from banks.

Debt securities decreased by €26,457 thousand, mainly due to the maturity of bonds issued by the parent Bank.

Total equity of the Group (including minority interests) amounted to €389,449 thousand at the end of March 2009, of which €352,813 thousand is attributable to majority owners.

Deposits from banks and non-bank customers increased from 60.5 per cent at the end of 2008 to 61.9 per cent of total liabilities at the end of March 2009. Loans from banks and non-bank customers accounted for 21.6 per cent of the total liabilities at the end of March 2009, and the portion of subordinated liabilities remained the same as at the 2008 year-end. Debt securities dropped by 0.5 percentage points to 1.4 per cent of the total liabilities.

## Plans for 2009

In its Spring forecast of economic trends 2009, the Institute of Macroeconomic Analysis and Development of the Republic of Slovenia (IMAD) corrected significantly downwards the forecast of key macroeconomic aggregates for Slovenia for the coming years. The anticipated 2009 negative GDP growth of 4 per cent will be the result of, in particular, moderate development of key factors of economic growth from previous years: smaller exports and investments and a decrease in consumer consumption in real terms. The forecasts of macroeconomic trends for Slovenia require careful planning and conduct of banks.

Despite the worsening projections, the strategic policies of the Nova KBM Group remain unchanged; however, due to the deteriorated market conditions, the implementation of these policies will be more frequently adapted to the actual situation in the market. An important strategic objective of the Nova KBM Group is to increase its presence in the markets of the SE Europe in which we expect an above-average long-term economic development, in particular in the provision of financial services.

The total assets of the Group are expected to increase by slightly less than 5 per cent during 2009. Due to the significantly changed market conditions, the Nova KBM Group is now preparing an amended plan (the original plan for the year 2009 was drafted on the basis of the starting-points from October 2008) in which, as a result of deteriorated and uncertain financial market conditions, it will increase the amount of impairment and provision expenses charged against the profit planned for 2009. The amended plan is expected to be adopted in the second quarter of the year.

In spite of unfavourable market conditions, Nova KBM increased its total assets by 2 per cent or €93,255 thousand in the first quarter of 2009, thus maintaining its market share of 9.6 per cent in total assets in December 2008. The Bank increased the volume of operations in key operating segments (loans and deposits). The market share in loans to non-bank customers increased from 9.9 per cent to 10.1 per cent.

The stability and safety of its operations was assured by an appropriate level of loan impairments. The impairment expenses increased by €9,372 thousand or 5 per cent in the first quarter of 2009, which resulted in an increase of the Bank's market share in this segment by 0.1 percentage points in the first three months of 2009 to 13.5 per cent.

The Bank generated a profit from continuing operations of €4,531 thousand in the first quarter of 2009. The profit was mainly achieved in core banking operations. At the same time, the cost/income ratio went down from 61.32 per cent to 55.48 per cent.

Net interest income amounted to €25,642 thousand in the first quarter of 2009, an increase of €957 thousand over the figure of the same period of last year. Net interest income generated by the Bank accounted for a 12.6 market share in the Slovene banking system (1 percentage point over the 2008 year-end figure).
