A short-term issuer default rating of the Bank remains the same at F2. The outlook is stable. This downgrade has no effect on Nova KBM's compliance with the covenants set forth in its loan agreements.

## Changes in the Supervisory Board of the Bank

The composition of the Bank's Supervisory Board remained unchanged in the first quarter of 2011.

## Letter to Shareholders

Dear Shareholders and Business Partners,

Global macroeconomic conditions continued to improve throughout the first quarter of 2011. The indices showed positive economic trends in the members of the Euro-zone, USA and Asia. The two main factors that caused some concern in this period were the earthquake in Japan and the political crisis in the Middle East and North African countries. Among negative factors that affected Europe we have to point out the difficulties resulting from the large public debt experienced by some of the PIIGS countries. A package of measures aimed at helping these countries overcome their difficulties has been approved at the EU level. In Slovenia, too, the economic conditions are gradually stabilizing, which is evidenced by a growth in industrial production and foreign trade. Compared to the same period of 2009, gross domestic product increased by 2.1% in real terms in the last quarter of 2010, and the same trend is expected for the first quarter of 2011 as well. Only the construction industry, in

which the deteriorated market conditions still prevail, stands out negatively.

For the first three months of 2011, the Nova KBM Group reported a pre-tax profit of €4.6 million from continuing operations, which was 69% below the figure of the same period last year, when a pre-tax profit from continuing operations totalled €14.7 million. This decrease was mainly the result of higher provisions and impairment losses, which amounted to €20.4 million, an increase of 35.5% from the €15.0 million reported for the first quarter of 2010. Notwithstanding this somewhat weak result, we believe that we will deliver the forecast profit of €33.9 million from continuing operations by the end of 2011. Net profit was €5.1 million (Q1 2010: €11.3 million) or €0.13 per share. The net profit generated in the first quarter of the year makes up 18.2% of the annual profit projection.

The Group's pre-tax return on average equity (ROAE) stood at 4.25%, up 0.11 percentage points from the 2010 year-end, yet it remains slightly below the projection. The Group's total assets had increased by 1.5% to €5.95 billion at the end of March 2011. Interest margin, calculated on the average total assets, was 2.45%, a decrease of 0.08 percentage points from the end of 2010, and 0.07 percentage points above the projected interest margin in 2011. As of 31 March 2011, the total capital adequacy was 11.07%, while the total shareholders' equity at the end of March 2011 amounted to €445.2 million, up 1.4% on the 2010 year-end figure. Nova KBM delivered a pre-tax profit of €3.7 million from continuing operations, while the net profit was €3.0 million.

In the first quarter of the year, the Bank worked intensively on a project to raise additional capital, which was successfully completed shortly after the end of the quarter. The parallel listing of the Bank's newly-issued shares on the Warsaw Stock

Exchange started on 11 May 2011. By issuing new shares, the Bank raised over €104 million of fresh capital. The proceeds of the capital increase will facilitate the accomplishment of the strategic objectives of the Nova KBM Group and help consolidate its market position. Moreover, the proceeds will also be used for the strengthening of the Group's capital position, the consolidation of Group companies, and for the strategic expansion of the Group into the target markets.

In spite of high impairment losses and provisions in the corporate banking area, we will do our utmost to achieve the operating projections we have made for the Nova KBM Group for the end of the year. We expect negative trends mainly in the construction industry and leasing services. We can assure you that we will

make every effort to increase profitability and to protect your interests, and will do anything within our power to increase the value added of our business. Following the successful capital increase, the Nova KBM Group now has a sound capital adequacy and is well prepared to deal with new challenges with respect to the implementation of its strategy and improvement in its profitability.

Maribor, May 2011

**Matjaž Kovačič**  
President of the Management Board

### KBMR share performance and the SBI TOP Index in the period from 3 January to 31 March 2011

## Operating result of the Nova KBM Group

For the period from 1 January to 31 March 2011, the Nova KBM Group reported a pre-tax **profit** of €4,565 thousand from continuing operations, a decrease of 69% from the same period last year. Higher impairment losses and provisions, higher administration costs, lower profits from investments in associates, and lower other operating net income contributed the most to a fall in gross profit.

**Net profit** of the Group totalling €5,092 thousand exceeds the profit of Nova KBM by €2,095 thousand. Apart from Nova KBM, which generated a net profit of €2,997 thousand, the following subsidiaries contributed the most to the net profit of the Group: PBS (€661 thousand), KBM Infond (€296 thousand) and Adria Bank (€257 thousand), as well as the associated company Zavarovalnica Maribor (€1,522 thousand).

In the period from January through March 2011, the Group generated a **net interest income** of €35,384 thousand, which accounts for 24.8% of the annual projection. Net interest income reported for the first quarter of 2011 is 0.1% below the figure reported for the same period last year. **Net fee and commission income** totalled €15,039 thousand, which is 26.1% of the annual projection and 0.3% above the figure reported for the same period last year.

**Net gains on financial assets and liabilities held for trading** amounted in the first quarter of 2011 to €2,633 thousand. For the period from January through March 2010, the Group reported a net loss of €2,205 thousand in this category. Net gains/losses result mainly from transactions in derivatives, the value of which is affected mostly by exchange rate fluctuations. **Net gain on financial assets and liabilities designated at fair value** through profit or loss was €320 thousand, while the **net loss on exchange rate differences** totalled €3,842 thousand. Due to the substance of transactions and the accounting method, the latter two items are related to net loss on derivatives, so it is therefore reasonable to observe the effects together.

**Other operating net income**, which includes mainly the income from the sale of real estate and other property, was €1,270 thousand.

**Administration costs, including depreciation and amortisation**, amounted to €28,293 thousand. The ratio of operating costs as a percentage of the average total assets was 1.93%, a decrease of 0.28 percentage points from the same period last year. The cost-to-income ratio improved as well, from 55.97% at the end of 2010 to 53.14% in the first quarter of 2011.

**Net provisions and impairment losses** totalled €20,383 thousand in the first three months of 2011.

In the period from January through March 2011, the Group made a profit of €1,630 thousand from **investments in associated companies**. For the same period last year, the Group reported a profit of €2,135 thousand in this income category.

The Group's pre-tax **return on average equity** (ROAE) stood at 4.25%, up 0.11 percentage points from the 2010 year-end.

The Group's pre-tax **return on average assets** (ROAA) was 0.31%, the same as reported for the 2010 year-end.

**Margin of financial intermediation** on the Group's average total assets was 3.70% in the first three months of 2011. **Interest margin**, calculated on the average total assets, was 2.45%.

### Structure of Group's assets

## Plans till the end of 2011

The planning of the business policy and financial plan of the Group and the Bank for the year 2011 was based on the strategy of the Group, as well as on the starting-points formulated in November 2010 and thereafter discussed and approved by the Bank's Supervisory Board. The latest forecasts with respect to the economic activity in the Euro-zone in the years 2011 and 2012 are more favourable, yet there is still some concern as to the speed and stability of economic growth.

In the first half of 2008, the Management Board of Nova KBM, together with the management of subsidiary and associated companies, formulated common strategic guidelines and objectives for the period until 2013. These were adjusted during 2009 and 2010 due to the global economic crisis and changes in the environment. The amended strategy was adopted by all Group companies and was approved by the Bank's Supervisory Board in May 2010. The Nova KBM Group will continue to pursue the guidelines and orientations set out in the strategy. Their implementation, however, will depend upon the operating conditions in the period of the crisis and gradual economic recovery. Both the Group and the Bank therefore favour stability over growth in accomplishing their 2011 business objectives, while considering prevailing economic and financial market conditions.

For 2011, the Group targets a pre-tax profit of €33,900 thousand from continuing operations. Net profit of the Group is projected at €27,996 thousand, of which €23,402 thousand is attributable to majority shareholders. Net interest income is projected at €142,412 thousand and net fee and commission income at €57,527 thousand. Administration costs, including depreciation and amortisation, are projected at €124,835 thousand. Net impairment losses and provisions of the Group are projected at €67,184 thousand. Due to the anticipated gradual improvement of the quality of the credit portfolio as a result of a moderate recovery of the real economy sector after the crisis, the projected expenses for impairment losses and provisions still exceed the income from reversed impairment losses and provisions, but are in nominal terms below the 2010 figure.

The Group's total assets for the 2011 year-end are projected at €5,959,182 thousand, up 1.6% on the 2010 year-end figure.

The Group's total equity at the end of 2011 will amount to €567,162 thousand, while the equity attributable to owners of the parent will total €523,111 thousand.

For 2011, the Group's pre-tax return on average equity (ROAE) is projected at 6.66%, while the pre-tax return on average assets (ROAA) will stand at 0.57%. Interest margin is projected to account for 2.38% of the average total assets, while net non-interest income is projected to account for 1.40% of the average total assets. Margin of financial intermediation is therefore projected at 3.78% of the average total assets. Compared to the 2010 figure, the ratio of operating costs as a percentage of the average total assets is projected to decrease by 0.12 percentage points to 2.09%.

The column 'Adjustment' shows the non-adjusted items of net intra-segment income and expense. The discrepancies are a result of the fact that the income of certain segments is not necessarily the expense of others, but is accounted for as 'Administration costs', which is not included in the 'Analysis by operating segments'.

Non-consolidated net profit of the **banking segment**, without taking into consideration consolidation entries, amounts to €5,074 thousand. The impact of consolidation entries, such as net operating profit of associates, payment of dividends of subsidiaries, income or expense on impairment due to transition to the uniform classification, and of other entries, on profit or loss amounts to €2,695 thousand. The profit of this segment, taking into account the consolidation entries, thus amounts to €7,769 thousand. After excluding inter-segment income, expense and costs of €3,182 thousand, and taking into account the consolidation entries, the consolidated net profit of the banking segment amounts to €4,587 thousand.

Non-consolidated net loss of the **leasing segment** is €2,431 thousand. After excluding inter-segment income, expense and costs of €2,185 thousand, the net loss of the leasing segment, on a consolidated basis, amounts to €246 thousand.

The **fund management** segment reported a non-consolidated net profit of €296 thousand. After excluding inter-segment income, expense and costs of €21 thousand, the net profit of the fund management segment, on a consolidated basis, amounts to €317 thousand.

Non-consolidated net loss of the **real estate segment** amounts to €545 thousand. After excluding inter-segment income, expense and costs of €976 thousand, the net profit of the real estate segment, on a consolidated basis, amounts to €431 thousand.

The **segment of other activities**, which includes mobile payments, reported a non-consolidated net operating profit of €3 thousand, which equals net profit of this segment on a consolidated basis.
