Performance highlights for the period January – June 2011

Operating results for the first six months of 2011

- The Nova KBM Group (hereafter also referred to as the 'Group') reported a **profit from continuing operations before impairment charges and provisions** of €50,544 thousand, which was 50.0% of the figure projected for the year as a whole. Operations of the Group are still affected by deteriorated economic conditions and sluggish recovery of the global economy. Despite some optimistic projections, economic conditions have not yet stabilised. Consequently, the Group had to recognise **high provisions and impairment losses** as a result of increased credit risk. In the period from January through June 2011, net provisions and impairment losses amounted to €48,910 thousand, which accounted for 72.8% of the annual projection.
- The Group's **total assets** were €5,844,249 thousand as of 30 June 2011, a decrease of 0.4% from the end of 2010, mainly as a result of the repayment of loans borrowed in the international market in previous years, which was partially offset by an increase in customer deposits and equity. The size of the loan portfolio shrank, while the investments in financial assets increased.
- In the first six months of 2011, the Group generated **net interest income** of €68,345 thousand, which was 48.0% of the annual projection, and 4.5% less than in the same period last year.
- The Group's **net fee and commission income** in the first half of 2011 totalled €30,406 thousand, which was 52.9% of the annual projection, and 3.1% less than in the same period last year.
- **Administration costs, including depreciation and amortisation**, amounted to €60,144 thousand, which was 48.2% of the annual projection. The ratio of operating costs as a percentage of the average total assets was 2.05%, a decrease of 0.16 percentage points from 2010. The cost-to-income ratio improved as well, from 55.97% at the end of 2010 to 54.34% for the period from January through June 2011.
- The half-year results of both associated companies (Zavarovanica Maribor d.d. and Moja naložba d.d.) were better than projected, so the Group made a profit of €2,801 thousand from **investments in associated companies**, which accounted for 56.4% of the annual projection.
- The Group's **pre-tax return on average equity** (ROAE) stood at 0.70%, which was below the figure reported for the end of 2010.
- The Group's **pre-tax return on average assets** (ROAA) was 0.06%, which was less than at the end of 2010 and also less than projected for 2011.
- As of 30 June 2011, the **total equity of the owners of the parent** amounted to €497,451 thousand, an increase of €100,511 thousand, or 25.3%, from the end of 2010, as a result of the capital increase carried out in the first half of 2011. The Group's total adequacy ratio was 12.79% at the end of June 2011.

Other important events

April

- In the period from 4 to 13 April, within the scope of capital raising activities, the representatives of the Bank held individual meetings with a number of potential investors.

- The representatives of the Bank participated in the Slovene Capital Market Days, where several meetings with the investors were held as well.

May

- On 3 May, the representatives of the Bank participated in the investors' conference in Stockholm, where they also met with several potential investors.
- The parallel listing of the Bank's newly-issued shares on the Warsaw Stock Exchange started on 11 May 2011. By issuing new shares, the Bank raised over €104 million of fresh capital.

June

- On 8 June, Moody's Investors Service, one of the leading rating agencies, downgraded the rating of Nova KBM from Baa1/P-2/D to Baa3/P-3/D- (long-term; short-term; financial strength). The outlook is negative.
- On 22 June, the Bank announced its intention to take over all the shares of Zavarovalnica Maribor d.d.

Changes in the Supervisory Board of the Bank

There were no changes in the composition of the Bank's Supervisory Board in the first half of 2011.

Events after the end of the reporting period

July

- 11 July: announcement of the takeover bid for Zavarovalnica Maribor d.d.
- 18 July: Nova KBM passes the EBA stress test. According to the common baseline scenario, the Bank's Core Tier 1 capital ratio (CT1R) would be 10.2% at the end of 2012, while the ratio would stand at 8.0% under the assumption of the adverse scenario.
- 22 July: KBM Infond d.o.o. starts taking over 'Krekovi skladi' (mutual funds of Krekova Družba).
- 22 July: Shareholders' Meeting of Nova KBM. The following Supervisory Board members are recalled: Danilo Toplek, Ivan Vizjak and Alenka Bratušek. Darjan Petrič, Ivan Simič and Vida Lebar are appointed as Supervisory Board members for the next four-year period.
- Nova KBM injected additional capital of €5,000 thousand into Credy banka a.d., thus increasing its shareholding from 72.38% to 76.64%.
- Nova KBM injected additional capital of €6,922 thousand into Zavarovalnica Maribor d.d. and thus increased its shareholding from 49.96% to 50.70%.

Letter to Shareholders

Dear Shareholders and Business Partners,

In the second quarter of 2011, we saw conditions in the global capital market deteriorate once again, mainly as a result of uncertainty with respect to the indebtedness of Greece and other European countries which form the so-called PIIGS group. The uncertainty was enhanced even further due to the record-high debt of the USA. Views about the best way out of the crisis have been very divided. The foregoing negative factors culminated in an increased volatility in the global financial market, causing many financial institutions to withdraw from investments in the state debt of the PIIGS group of countries and from other high-risk investments. The Slovene economic conditions are gradually stabilizing, which is evidenced by growth in industrial production and foreign trade as well as a moderate decrease in the number of unemployed. On the other hand, the construction industry is still registering negative growth, and we have witnessed

an increased number of companies engaged in the construction industry filing for bankruptcy. Compared to the same period of 2010, gross domestic product increased by 2.0% in real terms in the first quarter of 2011, and the same trend is expected for the second quarter of 2011.

The results of the Nova KBM Group for the first half of 2011 were affected by an increased number of bankruptcy proceedings and, consequently, provisioning expenses, which were significantly higher than projected. For the first half of 2011, the Nova KBM Group reported a pre-tax profit of €1.6 million from continuing operations, which was a sharp drop from the first half of 2010, when pre-tax profit totalled €25.3 million. Net profit was €2.8 million (H1 2010: €17.2 million) or €0.07 per share. The net profit generated by the Nova KBM Group in the first half of the year made up 10.1% of the annual profit projection. Nova KBM delivered a pre-tax profit of €7.0 million from continuing operations, while the Bank's net profit totalled €5.6 million.

The Group's total assets remained flat at €5.8 billion. Interest margin, calculated on the average total assets, was 2.35%, a decrease of 0.18 percentage points from the end of 2010, and 0.03 percentage points below the projected interest margin in 2011. As of 30 June 2011, the total capital adequacy was 12.79%, while the total shareholders' equity at the end of June 2011 amounted to €539.6 million, up 22.9% on the 2010 year-end figure. Nova KBM passed the EBA stress test successfully. According to the common baseline scenario, the Bank's Core Tier 1 capital ratio would reach 10.2% at the end of 2012, while the ratio would stand at 8.0% under the assumption of the adverse scenario.

The parallel listing of the Bank's newly-issued shares on the Warsaw Stock Exchange started on 11 May 2011. By issuing new shares, the Bank raised over

€104 million of fresh capital. The proceeds of the capital increase will facilitate the accomplishment of the strategic objectives of the Nova KBM Group and help consolidate its market position. Moreover, the proceeds will also be used for the strengthening of the Group's capital position, the consolidation of Group companies, and for the strategic expansion of the Group into the target markets of the Adria region. The Bank has already made the first step towards the consolidation of the Group by announcing a takeover bid for Zavarovalnica Maribor d.d., which will be, as a subsidiary company, fully consolidated within the Nova KBM Group from the third quarter of 2011. By the end of the year, the Group will have made every effort to improve its funding sources (projected bond issue), to reduce the level of bad loans, and to enhance the profitability of its operations. In spite of high impairment losses and provisions in the corporate banking area, we will do our utmost to ensure our results

are as close as possible to the operating projections we have made for the Nova KBM Group for the end of the year. We expect negative trends mainly from sub-contractors in the construction industry, and in leasing services. We will continue implementing our strategy, which is focused on the expansion of the Group's presence in the Adria region, further strengthening of risk management, diversification of income sources, and the creation of adequate value for you, our shareholders.

Maribor, August 2011

Share performance

In the period from 3 January to 30 June 2011, the price of KBMR shares traded in the prime market of the Ljubljana Stock Exchange ranged between €6.45 and €10.50. The following factors had the most adverse effect on the performance of KBMR shares: (i) the price of KBMR shares issued in the May 2011 capital raising, which was set at €8.00; (ii) the negative political and economic climate; and (iii) uncoordinated action and the attitude of the state, as the largest indirect shareholder of the Bank, during the capital raising process. During the reporting period, the highest share price was €10.50, reached on 9 February 2011, whereas the lowest price was recorded on 28 June 2011 when the share price fell to €6.45.

In the first half of 2011, the combined trading turnover in KBMR shares on the Ljubljana and Warsaw Stock Exchange amounted to €13,118,890 and 1,191,833 shares changed ownership. The average daily turnover was €103,298 or 9,385 shares per trading day. As of 30 June 2011, Nova KBM d.d. had in total 99,110 shareholders.

Operating result of the Nova KBM Group

For the period from January through June 2011, the Nova KBM Group reported a pre-tax **profit** of €1,634 thousand from continuing operations. As a result of the effect of deferred taxes⁶, net profit of the Group exceeded by €1,191 thousand the pre-tax profit from continuing operations. Lower than projected profit from continuing operations was due to sluggish and unstable recovery of the local economy and uncertain developments in the European financial markets. The pre-tax profit generated by the Group in the first half of the year made up 4.8% of the annual profit projection. The following items contributed the most to the weak result reported for the first half of the year: higher provisions and impairment losses, lower other operating net income and lower net interest income.

The Group's profit from continuing operations before provisions and impairment losses totalled €50,544 thousand, which was 50.0% of the annual projection. Operations of the Group are still affected by adverse market conditions and slow recovery of the economic environment. Despite some optimistic projections, economic conditions have not yet stabilised. Consequently, the Group had to recognise high provisions and impairment losses as a result of increased credit risk. In the period from January through June 2011, net provisions and impairment losses amounted to €48,910 thousand, which accounted for 72.8% of the annual projection.

In the period from January through June 2011, the Group generated **net interest income** of €68,345 thousand, which accounted for 48.0% of the annual projection. Lower than projected net interest income is mainly the result of changes in the structure of the Group's assets and liabilities. Compared to the same period of 2010, interest expense increased by 18.7%, mainly due to higher interest rates on long-term loans and deposits raised which resulted in higher costs of funding.

Net fee and commission income generated by the Group in the first half of 2011 totalled €30,406 thousand, which made up 52.9% of the annual projection, mainly as a result of higher than projected fees and lower fee and commission expense. Compared to the same period of 2010, net fee and commission income fell by 3.1%, largely due to a lower fee and commission income. Fees earned on credit operations registered the most significant decrease, followed by fees on current accounts and fees charged to customers for transactions in securities.

⁶ For the period from January through June 2011, the income tax expense from continuing operations of the Group totalled €2,238 thousand, while the income from deferred taxes amounted to €3,429 thousand.

Structure of income and expense

The **dividend income** generated in the first half of 2011 made up 89.9% of the annual projection. This income totalled €2,720 thousand and pertains mainly to the dividends from Mercator (€1,578 thousand), Gorenjska banka (€574 thousand), Petrol (€322 thousand) and Cinkarna Celje (€139 thousand).

Gains on financial assets and liabilities not measured at fair value through profit or loss amounted to €837 thousand in the first half of 2011, well above the projection of €100 thousand for the year as a whole. This result derived mainly from net gain on loans in the amount of €933 thousand, which was partially offset by a net loss of €117 thousand incurred on available-for-sale financial assets.

Net gains on financial assets and liabilities held for trading totalled €629 thousand, compared to a net loss of €5,875 thousand reported for the same period last year. Net gains reported for the first half of 2011 were primarily due to the net gain from the purchase and sale of foreign exchange (€294 thousand), net gain on derivatives (€180 thousand), and net gain from trading in equity instruments (€155 thousand).

Net loss on financial assets and liabilities designated at fair value through profit or loss amounted to €2,161 thousand (H1 2010: net loss of €3,340 thousand) and relates to the impairment of securities designated at fair value.

Net gains on exchange rate differences were €3,515 thousand (H1 2010: net gain of €11,365 thousand). The main reason for a decrease in foreign exchange gains was a smaller change in exchange rate for Swiss franc compared to the same period last year. As regards currency risk, the Group is primarily exposed to fluctuations in the Swiss franc exchange rate since it maintains a very long position in this currency. The Group uses derivatives to protect its long position in Swiss francs.

Other operating net income, which includes mainly the income from the sale of real estate and other property, totalled €2,766 thousand, or 18.5% of the annual projection. The lower than expected results were due to the Group's engagement in the real estate operations which are affected by the difficulties in the construction industry.

Administration costs, including depreciation and amortisation, reached €60,144 thousand, which accounted for 48.2% of the annual projection. Administration costs, including depreciation and amortisation, increased by 3% compared to the same period last year. In relative terms, depreciation and amortisation costs increased the most (10.8%). Higher depreciation of property, plant and equipment, and amortisation of intangible assets were due to larger investments in buildings (in particular 'Maistrov dvor') and computer

equipment. Also, it needs to be pointed out that Credy banka a.d. and the operating costs associated with this bank were not included in the Group's accounts for the first quarter of 2010. The Group expects more significant positive financial effects resulting from the restructuring of Credy banka a.d. to be seen this year and in the coming years. The ratio of operating costs as a percentage of the average total assets was 2.05%, a decrease of 0.16 percentage points from 2010. The cost-to-income ratio improved as well, from 55.97% at the end of 2010 to 54.34% for the period from January through June 2011.

The half-year results of both associated companies (Zavarovanica Maribor d.d. and Moja naložba d.d.) were better than projected, so the Group made a profit of €2,801 thousand from **investments in associated companies**, which accounted for 56.4% of the annual projection.

Total profit from non-current assets and disposal groups classified as held for sale amounted to €270 thousand in the first half of 2011, as a result of selling holiday apartments of Nova KBM above their book value.

The Group's **return on average equity** (ROAE) after tax stood at 1.20%, which was approximately two times worse than at the end of 2010.

The Group's **return on average assets** (ROAA) after tax was 0.06%, which was less than at the end of 2010 and also less than projected for 2011. ROAA of six Group companies was below the ratio reported by the Group as a whole.

Margin of financial intermediation, calculated on the average total assets, was 3.83%, down 0.12 percentage points from the end of 2010. **Interest margin**, calculated on the average total assets, was 2.35%, a decrease of 0.18 percentage points from the end of 2010.

Moderate and unstable economic growth, together with increasing payment indiscipline, is causing a further deterioration in the credit risk of the Group.

Financial position of the Nova KBM Group

The **Group's total assets** amounted to €5,844,249 thousand as of 30 June 2011, a decrease of €22,408 thousand from the 2010 year-end. At the end of June 2011, the aggregate market share of Nova KBM and PBS in terms of total assets accounted for 11.2% of the Slovene banking system.

As regards the Group's structure of **liabilities and equity**, the most notable changes in the period from January through June 2011 were as follows:

- loans and advances from banks fell by €280,322 thousand, or 26%, mainly due to the repayment of loans which Nova KBM contracted in previous years
- total equity increased by €100,657 thousand, or 23%, mainly as a result of capital raising by Nova KBM
- customer deposits increased by €113,393 thousand or 3%
- financial liabilities due to the central bank rose by €19,990 thousand or 15%
- debt securities increased by €11,218 thousand, or 17%, mainly due to the issue of certificates of deposit by Nova KBM.

As regards the Group's structure of **assets**, the most notable changes in the period from January through June 2011 were as follows:

- net loans and advances decreased by €136,657 thousand or 3% (loans and advances to banks decreased by €39,039 thousand, while loans and advances to customers decreased by €97,618 thousand)
- available-for-sale financial assets fell by €22,729 thousand, or 3%, mainly as a result of the maturity of the KBM 6 bond
- held-to-maturity financial assets increased by €54,251 thousand, largely due to the purchase of bonds by Nova KBM
- financial assets designated at fair value through profit or loss increased by €29,978 thousand.

Plans till the end of 2011

The planning of the business policy and financial plan of the Group and the Bank for the year 2011 was based on the strategy of the Group, as well as on the starting points formulated in November 2010 and thereafter discussed and approved by the Bank's Supervisory Board. The latest forecasts with respect to the economic activity in the eurozone in the years 2011 and 2012 are more favourable, yet there is still some concern as to the speed and stability of economic growth.

In the first half of 2008, the Management Board of Nova KBM, together with the management of subsidiary and associated companies, formulated common strategic guidelines and objectives for the period until 2013. These were adjusted during 2009 and 2010 due to the global economic crisis and changes in the environment. The amended strategy was adopted by all Group companies and was approved by the Bank's Supervisory Board in May 2010. The Nova KBM Group will continue to pursue the guidelines and orientations set out in the strategy. Their implementation, however, will depend upon the operating conditions in the period of the crisis and gradual economic recovery. Both the Group and the Bank therefore favour stability over growth in accomplishing their 2011 business objectives, while considering prevailing economic and financial market conditions.

For 2011, the Group projected a pre-tax profit of €33.9 million from continuing operations. Net profit of the Group was projected at €28 million, of which €23.4 million is to be attributable to majority shareholders. Due to slower than anticipated improvement in the quality of the loan portfolio as a result of sluggish recovery of real economy, the 2011 level of impairment losses is expected to exceed the projection. Despite the weak results in the first half of the year, we expect the performance of the Group to improve in the third and fourth quarters, and the results of the second half of 2011 to be in line with projections.

The Group's total assets for the 2011 year-end are projected at €5,959 million, slightly above the figure reported for the end of 2010. The Group's total equity at the end of 2011 will amount to €567.2 million, while the equity attributable to owners of the parent will total €523.1 million.

Interest margin is projected to account for 2.38% of the average total assets, while net non-interest income is projected to account for 1.40% of the average total assets. Margin of financial intermediation is therefore projected at 3.78% of the average total assets. Compared to the 2010 figure, the ratio of operating costs to the average total assets is projected to decrease by 0.12 percentage points to 2.09%.

Notes to the financial statements of the Nova KBM Group

The financial statements of the Group for the period ended 30 June 2011 were authorised for issue on 2 August 2011 by the Management Board of Nova KBM d.d.

Statement of compliance

The consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRSs) as endorsed by the European Union.

The interim financial report is prepared in a condensed form and includes selected explanatory notes as requested in accordance with IFRSs.

The interim financial statements are unaudited.

Presentation and functional currency

Items included in the consolidated financial statements are presented in euro, which is the functional and presentation currency of the Group.

All amounts in the consolidated financial statements and in notes to the financial statements are expressed in thousands of euros except where stated otherwise. Due to rounding off of individual amounts, calculation differences may occur upon data aggregation.

Significant accounting policies

Adopted accounting policies have been consistently applied in both reporting periods presented in these consolidated financial statements.

The accounting policies applied are presented in detail in the 2010 Annual Report of the Nova KBM Group.
