# Performance highlights for the period January – September 2011

## Operating results for the first nine months of 2011

- The Nova KBM Group (hereafter also referred to as the 'Group') reported a **profit from continuing operations before impairment charges and provisions** of €63,707 thousand, which was 63.0% of the figure projected for the year as a whole. Operations of the Group are still affected by deteriorated economic conditions and sluggish recovery of the global economy. Despite some optimistic projections, economic conditions have not yet stabilised. Consequently, as a result of increased credit risk, the Group had to recognise **high provisions and impairment losses**. In the period from January through September 2011, net provisions and impairment losses totalled €69,781 thousand, which accounted for 103.9% of the annual projection.
- In the first nine months of 2011, the **Nova KBM Group generated a pre-tax loss** of €6,074 thousand from continuing operations. The negative result must primarily be attributed to the following factors: higher than projected provisions and impairment losses; a decrease in other operating net income; a decrease in net interest income; losses on financial assets and liabilities not measured at fair value through profit or loss; lower than projected profits from investment in the equity of associates;
- The Group's **total assets** were €5,856,923 thousand as of 30 September 2011, a decrease of 0.2% from the end of 2010, mainly as a result of the repayment of loans borrowed in the international market in the previous years, which was partially offset by an increase in customer deposits and equity. The size of the Group's loan portfolio shrank, while its investments in financial assets increased.
- The Group generated **net interest income** of €101,850 thousand in the first nine months of 2011, which was 71.5% of the annual projection.
- The Group's **net fee and commission income** totalled €45,114 thousand, which accounted for 78.4% of the annual projection.
- **Administration costs, including depreciation and amortisation**, amounted to €89,948 thousand, or 72.1% of the annual projection. The ratio of operating costs as a percentage of the average total assets was 2.04%, a decrease of 0.17 percentage points from 2010.
- For the first nine months of 2011, the Group reported a profit of €2,856 thousand from **investment in the equity of associates**, which made up 57% of the annual projection.
- As a result of loss reported for the first nine months of the year, the Group's **pre-tax return on average equity (ROAE)** was negative and stood at 1.66%. The Group's **pre-tax return on average assets (ROAA)** was negative as well, at 0.14%.
- As of 30 September 2011, the **total equity of the Nova KBM Group** amounted to €525,018 thousand, an increase of €86,029 thousand, or 19.6%, from the end of 2010, as a result of the H1 2011 capital increase. The Group's total adequacy ratio was 12.78% at the end of September 2011.

## Other important events

### January

- On 19 January, Nova KBM was awarded the '*Naj Mariborčan*' prize (the best large company in the region), while Matjaž Kovačič, President of Nova KBM's Management Board, won the '*Naj direktor*' prize (the best manager).

- On 21 April, the representatives of the Bank participated in the Slovene Capital Market Days, where several meetings with the investors were held as well.

### May

- On 3 May, the representatives of the Bank participated in the investors' conference in Stockholm, where they also met with several potential investors.
- The parallel listing of the Bank's newly-issued shares on the Warsaw Stock Exchange started on 11 May 2011. By issuing new shares, the Bank raised over €104 million of fresh capital.

### June

- On 8 June, Moody's Investors Service, one of the leading rating agencies, downgraded the rating of Nova KBM from Baa1/P-2/D to Baa3/P-3/D- (long-term; short-term; financial strength). The outlook was changed to negative.
- On 22 June, the Bank announced its intention to take over all the shares of Zavarovalnica Maribor d.d.

### July

- On 11 July, the Bank announced a takeover bid for Zavarovalnica Maribor d.d.
- On 18 July, it was published that Nova KBM passed the EBA stress test. According to the common baseline scenario, the Bank's Core Tier 1 capital ratio (CT1R) would be 10.2% at the end of 2012, while the ratio would stand at 8.0% under the assumption of the adverse scenario.
- On 19 July, KBM Infond d.o.o. started taking over 'Krekovi skladi' (mutual funds of Krekova Družba).
- The Shareholders' Meeting of Nova KBM took place on 22 July. The following three Supervisory Board members were recalled: Danilo Toplek, Ivan Vizjak and Alenka Bratušek. Darjan Petrič, Ivan Simič and Vida Lebar were appointed as new Supervisory Board members for the next four-year period. The Shareholders' Meeting resolved to pay a gross dividend of €0.08 per share for the financial year 2010.
- Nova KBM injected additional capital of €5,000 thousand into Credy banka a.d., thus increasing its shareholding from 72.38% to 76.64%.
- Nova KBM injected additional capital of €6,922 thousand into Zavarovalnica Maribor d.d. and thus increased its shareholding from 49.96% to 50.70%.

### August

- On 12 August, it was published that a total of 6 accepting parties, which in aggregate held 73,800 shares of Zavarovalnica Maribor d.d., or 0.59% of its total outstanding shares, accepted the takeover bid.

- On 29 August, Dušan Jovanovič was appointed as the new Chairman of the Bank's Supervisory Board.

### September

- On 30 September, Fitch, one of the leading rating agencies, downgraded the long-term and short-term ratings of Nova KBM from BBB+ to BBB and from F2 to F3, respectively. The outlook remained stable.

## Events after the end of the reporting period

### October

- On 15 October, KBM Infond completed the takeover of the umbrella fund of Krekova Družba. Since then, KBM Infond has been managing 17 funds and sub-funds in total.
- The Bank's Management Board and the Coordination Body of Nova KBM's trade union signed a new collective agreement on 21 October. This agreement is valid for an unlimited period with effect from 1 November 2011. The tariff schedule of the agreement will remain in force for two years, i.e. until 31 October 2013. Both parties to the agreement were of the opinion that the new collective agreement does not reduce the most important labour standards at Nova KBM, but, in general, preserves them. Moreover, the new agreement sets out more clearly the objective provisions and criteria for enforcing certain rights, thus setting up the conditions for reducing labour costs while providing greater flexibility for rewarding individual employees.
- At its meeting held on 27 October, the European Banking Association (EBA) reached a decision on measures to restore the confidence in the banking sector. Banks are required to establish a buffer such that a Core Tier I Capital ratio reaches 9% by the end of June 2012. The plans with respect to the capital target have to be agreed with the National Supervisory Authorities and discussed with the EBA. As of 30 September 2011, the Nova KBM Group's Core Tier I Capital ratio stood at 9.40%, meaning that the Bank already meets the criteria set by the EBA.

### November

- On 14 October, the representative of Nova KBM held a meeting in Ljubljana with several investors and analysts.

## Changes in the Supervisory Board of the Bank

A change in the composition of the Bank's Supervisory Board was made in the third quarter of the year. At the Shareholders' Meeting taking place on 22 July 2011, a decision was reached to recall the following three Supervisory Board members: Danilo Toplek, Ivan Vizjak and Alenka Bratušek. Darjan Petrič, Ivan Simič and Vida Lebar were appointed as new Supervisory Board members for the next four-year period. Dušan Jovanovič was appointed as the new Chairman of the Bank's Supervisory Board on 29 August.

# Letter to Shareholders

Dear Shareholders and Business Partners,

In the third quarter of 2011, we saw the global capital market experience its most difficult time since the collapse of Lehman Brothers in 2008. The projections for the eurozone were becoming rapidly worse. The increased economic risk due to the unsustainability of the Greek foreign debt spread to other countries of the eurozone and affected the European banking system. In September, Moody's downgraded Slovenia from Aa2 to Aa3. This was followed by a downgrade of larger Slovene banks, which adversely affected their funding costs and competitive position. As a result of difficult conditions faced by the corporate sector and because a number of companies were filing for bankruptcy, the quality of the banks' loan portfolios continued to decline. The operations of Nova KBM and the performance of its shares were negatively affected by these factors.

Nevertheless, Nova KBM remains a stable financial institution; a fact that can be attributed to the strategic decisions we have taken in the past. The May 2011 capital increase significantly reduced the risk of non-compliance with the capital adequacy requirements. Further, we must point out the activities of the European Central Bank (ECB) which, by introducing one-year refinancing operations, helped ease the liquidity crunch for many banks. Based on a thorough economic and monetary analysis, the ECB Council resolved to cut the key interest rates by 25 basis points to 1.25%.

The results of the Nova KBM Group for the first three quarters of 2011 were affected by an increased number of bankruptcy proceedings and, consequently, by provisioning expenses, which were significantly higher than projected. The level of provisions and impairment losses already exceeded the annual projection for 2011 in the first three quarters of the year. In the first nine months of 2011, the Nova KBM Group delivered a profit before provisions and impairment losses of €63.7 million, while it posted a pre-tax loss of €6.1 million from continuing operations. Net loss totalled €4.4 million or €0.15 per share. As of 30 September 2011, the total capital adequacy of the Nova KBM Group was 12.78%, while the total shareholders' equity at the end of September 2011 amounted to €525.0 million, up 19.6% on the 2010 year-end figure. Nova KBM delivered a pre-tax profit of €7.3 million from continuing operations in the first three quarters, while the Bank's net profit totalled €6.2 million.

Due to pressure on the interest rate margin, and especially due to high provisioning expenses, the Bank focused particularly on cost reduction; administration costs fell by 3.4% compared to the same period last year. Further, special attention was paid to risk management with respect to financial

investments. The exposure of Nova KBM to financial institutions and countries from the so-called PIIGS group is minor and does not constitute a systemic risk. Nova KBM is not exposed to Greece which, due to its high indebtedness, is currently considered the country most at risk within the eurozone. Consolidation of ownership of Group companies was another challenge dealt with by the Bank. To that effect, the Bank successfully increased its shareholding in Zavarovalnica Maribor d.d. to the current 51.0%.

The expected improvement of the economic environment did not take place. Economic prospects continue to be affected by great uncertainty and enhanced risk of recovery slowdown. Some of these risks are already materialising, so it is highly probable the forecasts and projections of the average growth in gross domestic product (GDP) for 2012 will be revised considerably downwards. The global economy and financial markets will be exposed to many uncertainties going forward. The prospects for the eurozone depend on the extent to which the debt crisis can be solved, as

well as on the budget deficits of PIIGS and of some other eurozone countries.

The worsening of economic conditions caused higher than projected provisions and impairment losses, and a fall in real estate and security prices. Consequently, both Nova KBM and the Nova KBM Group will not meet their operating targets for the end of 2011. We estimate the provisioning expenses at the Nova KBM Group level to be between 30% and 40% above the projection, which will lead to a proportionally lower pre-tax profit. Further, we may expect the value of seized securities to fall by about 30%, which will have a negative effect on our performance as well. As a result of the aforementioned factors, both Nova KBM and the Nova KBM Group are expected to end the year with a loss from continuing operations.

Maribor, November 2011

President of the Management Board

## Profile of Nova KBM d.d. and the Nova KBM Group

Nova KBM d.d. (in this report also referred to as 'Nova KBM' or the 'Bank') is the parent company of the Nova KBM Group, which is composed of the parent company and 11 subsidiaries. In addition, the Bank has equity investments in two associates. The names of the companies and the Bank's shareholding in them are presented in the table below.

## Share performance

In the period from 3 January to 30 September 2011, the price of a KBMR share traded on the Ljubljana Stock Exchange, being the prime market for KBMR shares, ranged between €4.02 and €10.50. The following factors had the most adverse effect on the performance of KBMR shares: (i) the price of KBMR shares issued in the May 2011 capital raising, which was set at €8.00; (ii) the negative political and economic climate; and (iii) uncoordinated action and the attitude of the state, as the largest indirect shareholder of the Bank, during the capital raising process. During the reporting period, the highest share price was reached on 9 February 2011, at €10.50, while the lowest point was reached on 26 September 2011 when it closed at €4.02 and €3.76 in Ljubljana and Warsaw, respectively.

In the first nine months of 2011, the combined trading volume in KBMR shares on the Ljubljana and Warsaw Stock Exchange reached 2,010,200 shares. The average daily turnover was 22,587 shares per trading day. As of 30 September 2011, Nova KBM had 98,744 shareholders in total.

## Operating result of the Nova KBM Group

For the period from January through September 2011, the Nova KBM Group reported a **pre-tax loss of €6,074 thousand from continuing operations**. A pre-tax profit of €33,900 thousand was projected for 2011. The negative result must primarily be attributed to the following factors: higher than projected provisions and impairment losses; a decrease in other operating net income; a decrease in net interest income; losses on financial assets and liabilities not measured at fair value through profit or loss; lower than projected profits from investment in the equity of associates.

The Group's **net loss totalled €4,436 thousand**, which was €1,638 thousand less than the Group's loss from continuing operations, due to the positive effect of deferred taxes. The net result of the Group is €10,593 thousand lower than the net result reported by Nova KBM, mainly due to the impact of consolidation entries on the profit and loss account, and losses posted by Group members engaged in leasing and real estate activities.

The **Group's profit from continuing operations before impairment charges and provisions** amounted to €63,707 thousand. Operations of the Group are still affected by deteriorated economic conditions and sluggish recovery of the global economy. Despite some optimistic projections, economic conditions have not yet stabilised. Consequently, as a result of increased credit risk, the Group had to recognise high provisions and impairment losses. In the period from January through September 2011, net provisions and impairment losses totalled €69,781 thousand, which accounted for 103.9% of the annual projection. Provisions and impairment losses recognised in the first nine months of 2011 exceeded the figure reported for the same period last year by 39.6%.

In the period from January through September 2011, the Group generated **net interest income** of €101,850 thousand, which accounted for 71.5% of the annual projection. Lower than projected net interest income was mainly the result of changes in the structure of the Group assets, an increasing proportion of which is made up of investments that provide lower returns (portfolio of securities). Impairment of interest on loans granted to companies which have run into financial difficulties also had a negative effect on interest income. On the funding side, we have seen a trend of households shifting towards long-term deposits with higher rate of interest. Also, the refinancing of long-term loans obtained from banks in the past has become more costly.

**Net fee and commission income** generated by the Group in the first nine months of the year totalled €45,114 thousand, which made up 78.4% of the annual projection, mainly as a result of higher than projected fees and lower fee and commission expense. The reason for somewhat lower fee and commission expense are the costs associated with the Nova KBM's capital increase, which were partially (in the amount of actual costs incurred) transferred to the share premium (€3,263 thousand) and partially charged to administration costs (€227 thousand).

The **dividend income** earned in the first nine months of 2011 made up 97.6% of the annual projection. This income totalled €2,955 thousand and pertains mainly to the dividends from Mercator d.d. (€1,578 thousand), Gorenjska banka d.d. (€574 thousand), Petrol d.d. (€322 thousand) and Cinkarna Celje d.d. (€139 thousand).

**Losses on financial assets and liabilities not measured at fair value through profit or loss** totalled €4,509 thousand in the first nine months of 2011, while a gain of €100 thousand was projected for the year as a whole. A substantial part of this loss is related to loan write-offs.

**Net gains on financial assets and liabilities held for trading** totalled €6,464 thousand, mainly as result of net gain on trading in derivatives in the amount of €5,564 thousand. Valuation of currency forwards, which the Group uses for the economic hedging of foreign currency exposure and the effects of which are linked to the effects of exchange differences, had the largest impact on net gains on derivatives.

**Net loss on financial assets and liabilities designated at fair value through profit or loss** amounted to €6,442 thousand (9M 2010: net loss of €3,449 thousand) and related to the impairment of securities designated at fair value.

**Net gains on exchange rate differences** were €1,134 thousand, compared to a net gain of €10,036 thousand reported for the same period last year. For 2011, the Group had projected to post a gain of €8,335 thousand in this category of income.

**Other operating net income**, which includes mainly the income from the sale of real estate, totalled €3,342 thousand, or 22.3% of the annual projection. The lower than expected result was due to the Group's engagement in the real estate operations which are affected by the difficulties in the construction industry.

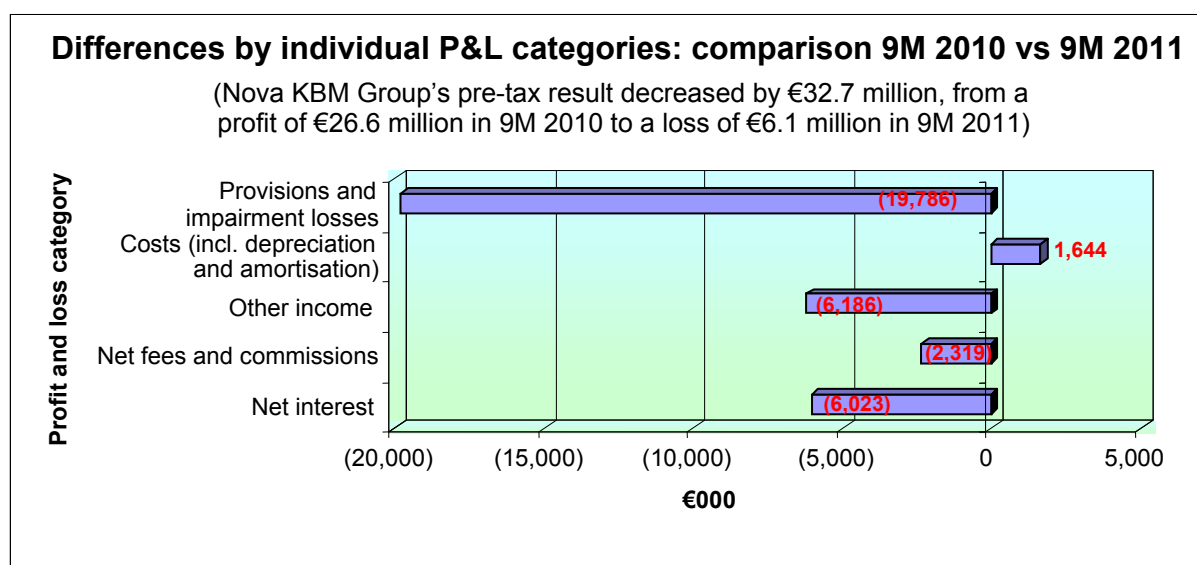

**Administration costs, including depreciation and amortisation**, reached €89,948 thousand, which made up 72.1% of the annual projection. Compared to the same period last year, administration costs, including depreciation and amortisation, decreased by 1.8%, despite the fact that Credy banka a.d. was not included in the Group's accounts for the first three months of 2010. The ratio of operating costs as a percentage of the average total assets was 2.04%, a decrease of 0.17 percentage points from 2010.

In the period from January through September 2011, the Group made a profit of €2,856 thousand from **investment in associated companies**, which accounted for 57.0% of the annual projection.

**Total profit from non-current assets and disposal groups classified as held for sale** amounted to €287 thousand, as a result of selling holiday apartments of Nova KBM above their book value.

As a result of loss reported for the first nine months of the year, the Group's **return on average equity** (ROAE) after tax was negative and stood at 1.22%. For the financial year 2011, the ratio was projected at 5.50%.

**Margin of financial intermediation**, calculated on the average total assets, was 3.51%, down 0.44 percentage points from the end of 2010, and 0.27 percentage points below the projection for 2011. **Interest margin**, calculated on the average total assets, was 2.32%, a decrease of 0.21 percentage points from the end of 2010, and 0.06 percentage points below the margin projected for 2011.

# Financial position of the Nova KBM Group

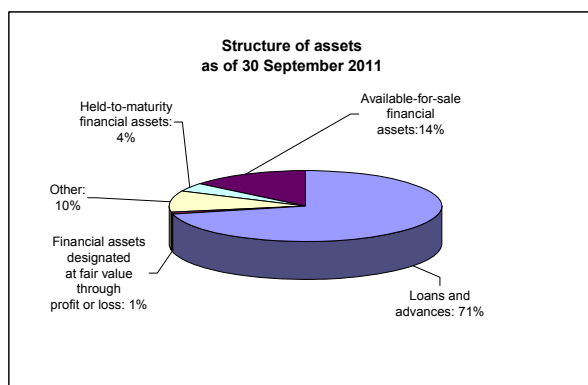

The **Group's total assets** amounted to **€5,856,923** thousand as of 30 September 2011, a decrease of 0.2% from the 2010 year-end. The decrease in total assets is mainly due to the repayment of loans raised in the interbank market in the previous years, which was partially offset by an increase in customer deposits and equity. The Group's loan portfolio shrank, while its investments in financial assets registered an increase in the first three quarters of 2011. At the end of September 2011, the aggregate market share of Nova KBM and PBS in terms of total assets accounted for 11.3% of the Slovene banking system.

As regards the structure of Group liabilities and equity, the most notable changes in the period from January through September 2011 were as follows:

- debts due to banks decreased by €307,190 thousand
- deposits from customers went up by €143,032 thousand
- total equity increased by €86,029 thousand (mainly as a result of capital raising)
- debt securities in issue increased by €14,338 thousand (issue of certificates of deposit)
- provisions rose by €11,161 thousand.

As regards the structure of Group assets, the most notable changes in the period from January through September 2011 were as follows:

- held-to-maturity financial assets increased by €52,076 thousand (purchase of bonds)
- other assets increased by €32,186 thousand
- financial assets designated at fair value through profit or loss increased by €25,751 thousand
- loans and advances to banks increased by €21,146 thousand
- loans and advances to customers fell by €119,697 thousand (more restrictive lending conditions and reallocation of assets from the loan portfolio to the securities portfolio)
- available-for-sale financial assets decreased by €45,853 thousand (bonds falling due).

## Plans till the end of 2011

The planning of the business policy and financial plan of the Group and the Bank for the year 2011 was based on the strategy of the Group, as well as on the starting points formulated in November 2010 and thereafter discussed and approved by the Bank's Supervisory Board. The latest forecasts with respect to the economic activity in the eurozone at the end of 2011 and in 2012 are less favourable and there is an increased concern as to the speed and stability of economic growth.

In the first half of 2008, the Management Board of Nova KBM, together with the management of subsidiary and associated companies, formulated common strategic guidelines and objectives for the period until 2013. These were adjusted during 2009 and 2010 due to the global economic crisis and changes in the environment. The amended strategy was adopted by all Group companies and was approved by the Bank's Supervisory Board in May 2010. The Nova KBM Group will continue to pursue the guidelines and orientations set out in the strategy. Their implementation, however, will depend upon the operating conditions in the period of the crisis and gradual economic recovery. Both the Group and the Bank therefore favour stability over growth in accomplishing their 2011 business objectives, while considering prevailing economic and financial market conditions. As a result of economic conditions, which were much worse during the year than those projected when the business plan was formulated, neither the Group nor the Bank will meet the 2011 operating targets.

In the second half of 2011, we have witnessed an increased number of Slovene companies filing for bankruptcy, leading to a further deterioration of banks' loan portfolios. Consequently, according to the Bank analysts, provisioning for bad loans is projected to increase even more in the last quarter of the year, both at the Group and at the Bank level. Based on the first assessment, impairment losses and provisions are expected to exceed the annual projection by one-third or even one-half as a result of increased credit risk. Lower than projected net interest income and net fee and commission income will also have a negative effect on the 2011 revenues of the Nova KBM Group. The analysts estimate that an increase in default and late payments is likely to continue throughout the third and fourth quarters of the year. In addition, realisation of collateral provided as security for loans can sometimes be very unpredictable in terms of time, which is a result of long-lasting court procedures and limited functioning of the markets. Due to the impact of the aforementioned negative factors, a loss from continuing operations is expected to be reported by both the Bank and the Nova KBM Group at the 2011 year-end.

## **Notes to the financial statements of the Nova KBM Group**

The financial statements of the Group for the period ended 30 September 2011 were authorised for issue on 10 November 2011 by the Management Board of Nova KBM d.d.

### **Statement of compliance**

The consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRSs) as endorsed by the European Union.

The interim financial report is prepared in a condensed form and includes selected explanatory notes as requested in accordance with IFRSs.

The interim financial statements are unaudited.

### **Presentation and functional currency**

Items included in the consolidated financial statements are presented in euro, which is the functional and presentation currency of the Group.

All amounts in the consolidated financial statements and in notes to the financial statements are expressed in thousands of euros except where stated otherwise. Due to rounding off of individual amounts, calculation differences may occur upon data aggregation.

### **Significant accounting policies**

Adopted accounting policies have been consistently applied in both reporting periods presented in these consolidated financial statements.

The accounting policies applied are presented in detail in the 2010 Annual Report of the Nova KBM Group.
